

Scrum Kick Off Meeting

Agenda

- Ice breaker
- Agile-Scrum Overview
- Scrum Roles & Responsibilities
- Sprint Cycles
- Scrum Ceremonies
- Day 0 activities
- Q&A

Icebreaker

- ❖ If you won a lottery of \$1 million, what would you do with all the money?
- ❖ If you could choose an age to remain forever, which age would you choose?

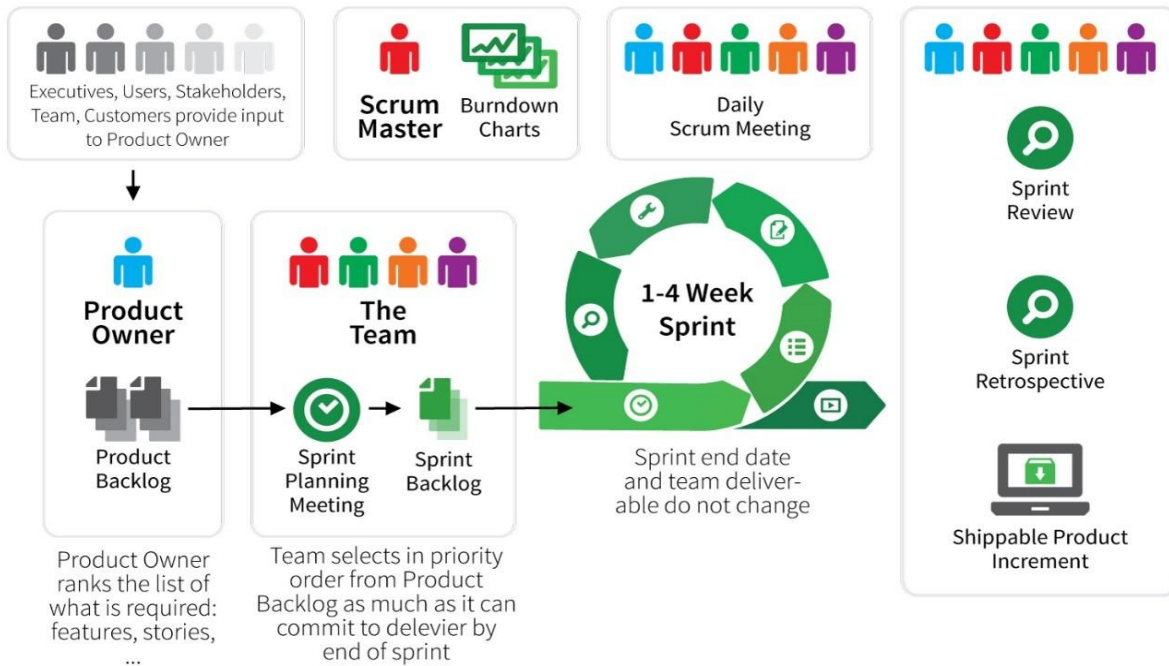

What is Agile-Scrum ?

Agile - method of project management, used especially for software development, that is characterized by the division of tasks into short phases of work and frequent reassessment and adaptation of plans.

Scrum - is a lightweight process framework for agile development that helps people, teams and organization generate value through adaptive solutions for complex problems. Scrum is subset of Agile methodology.

Scrum Framework

Scrum Framework at a Glance

Roles-Responsibilities in Scrum

Product owner:

- Represents the customer
- Develops and prioritizes user stories (features the customer wants in the product)
- Accepts and rejects work

Scrum Master:

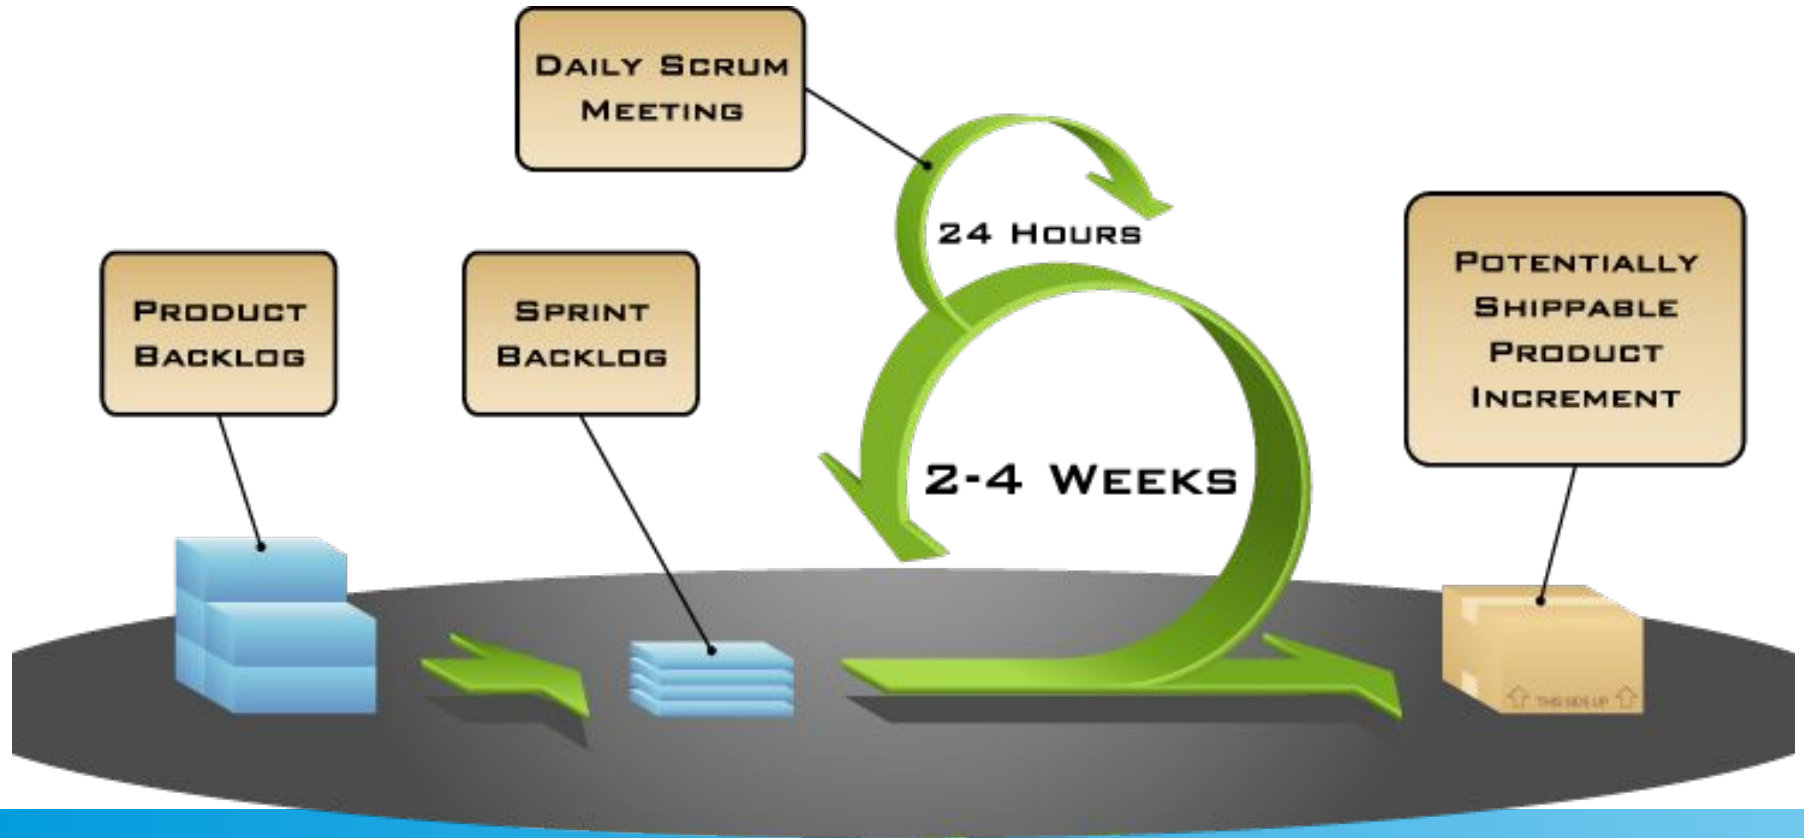

- Organizes work on the development team
- Ensures communication between roles
- Removes bureaucratic barriers

Developers:

- Responsible for delivering features
- Sizing stories, adding subtasks to stories assigned to you, moving stories to done when they are completed, and attending all Scrum ceremonies

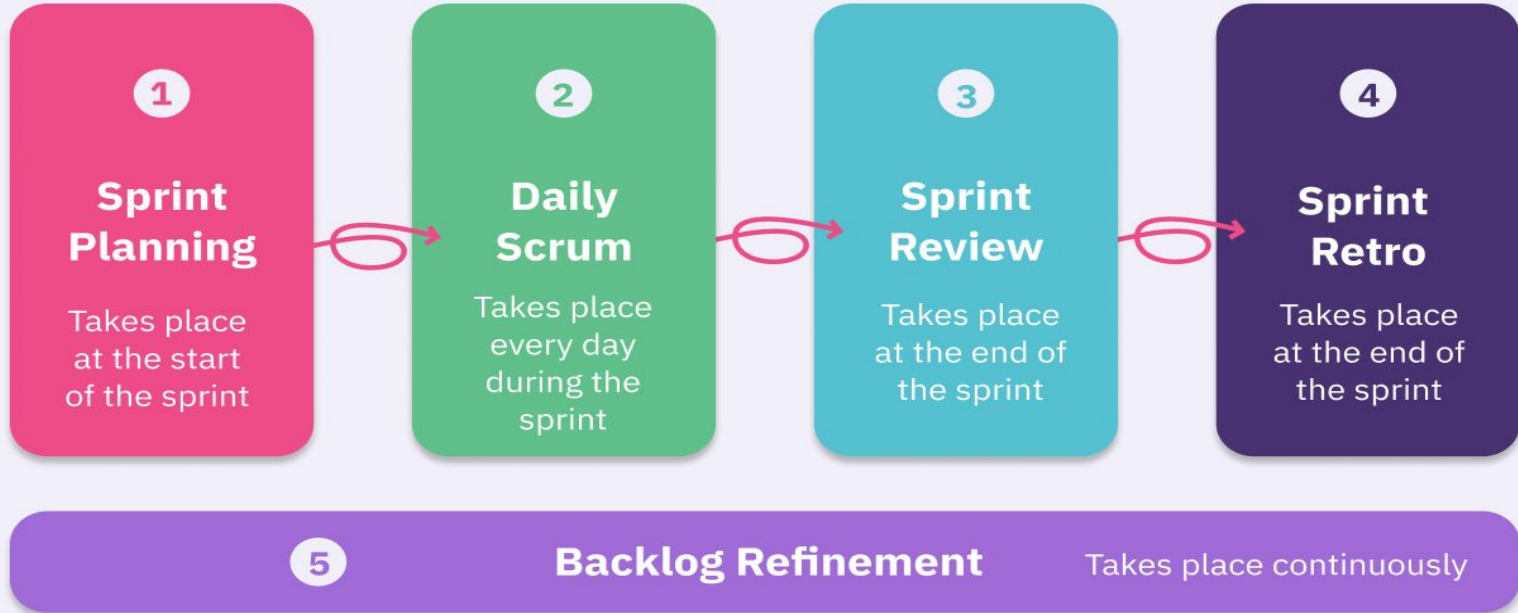

Sprint Cycle
